LEARN MORE ABOUT VOLKSMINING Button link to page with following text

Volksmining is a revolutionary cloud based storage solution created by the technology company NFTP Inc. We aim to create an open market for enterprise cloud storage solutions where all infrastructures are fully decentralized – physically and economically. We are committed to providing users with fast, reliable, and secure cloud storage solutions that meet their needs.

A disruptive technology to empower a inclusive community

In some countries, electricity availability is limited due to poor infrastructure and limited resources while other countries may have an unreliable supply of electricity or experience frequent power cuts.

In both cases, we have got you covered!

Volksmining cloud data storage device can be powered and operated by an inverter battery system; moreover, it can also be operated via solar panel due to its low energy consumption.

Volksmining's reward system is specially designed to be calculated via active seconds in the network which makes it ideal for the cloud based data operators – who are living in a backward area where there is a limited or unstable energy. This system ensures that operators are not over-penalized for the entire 24 hours of inactivity; instead, as it counts only the seconds of absence.

Entrepreneurship for a low investment

By owning a minimum of 1 volksmining device, you become a VM cloud data operator of the network. You are also helping to grow long term value of the network. As a VM cloud data operator, you can benefit from the enormous potential of the cloud computing market and earn a daily equitable portion of revenue.

Own a cloud storage service account and earn X-times of your investment , so don't hesitate to join.

How does the Volksmining device earn money?

The Volksmining device's major function is to maintain cloud data security and provide more cloud storage capacity to the network of UNIVERSAL REPUBLIC that offers their cloud storage users - a secure, private and reliable way to store and access their data at an affordable price. Each VOLKSMINING activedevice is automatically rewarded every 24 hours for its contribution to the network.

PLUG & EARN

Our slogan is **VOLKSMING PLUG & EARN.**

At Volksmining, we understand that not everyone is a tech expert, so our cloud data storage device makes sure to provide accessible, user-friendly solutions that allow you to take control of your device operations with ease. We have designed this platform to be easily navigable and to provide simple, intuitive functions that anyone can use to manage its device operations in no time.
